

AWS EKS Add-ons allows Independent Software Vendors (ISV) to deploy their solutions directly via the AWS Management console, making it simple for AWS EKS customers to quickly and easily add these solutions to their AWS architectures. This simplicity makes these solutions more attractive allowing the ISV to get ahead of the competition. Cloudsoft has helped many ISVs to successfully create and deploy their solution this way and our AWS EKS Add-On Advance solution provides ISV's with a trusted and experienced team to support them in this process

WHO IS ADVANCE FOR?

AWS EKS Add-on Advance is for ISVs who want to be able to offer their solution as an Add-on for AWS EKS users .

Creating add-ons can take up your teams time, duplicate effort you've already made on Helm chart deployment and requires a learning curve to get started. AWS EKS Add-On Advance from Cloudsoft offers you a pain-free way to deliver your Add-Ons quickly and with minimal effort. Our expert teams will support you on your EKS journey helping you to understand the keys steps to make your solutions available as an EKS Add-One, troubleshoot any potential issues and get familiar with the AWS automation tools that can help you on your journey.

THE ADVANCE PROCESS

As an ISV you want the simplest and quickest route to getting your EKS add-on available, working with Cloudsoft will accelerate your journey. Your teams wont be distracted from core tasks and we'll ensure that you need minimal effort to achieve maximum results.

Curate & Choose

Cloudsoft will consult with you to identify the solutions that you want to deliver as EKS Add-ons and help you plot the simplest path to achieving this.

Common Challenges

Cloudsoft will help you avoid the most common challenges associated with making your EKS Add-on ready

Automation

Cloudsoft will help you navigate the AWS automation process

Support

Typically, Cloudsoft will transfer resources to you to manage but we can also offer support packages for add-ons after publication.

ADVANCE PACKAGES

Cloudsoft offer a number of packages for technology providers who wish to accelerate their EKS Add-on Journey

Getting Started

- Analysis of current deployment methods
- Recommendations & troubleshooting
- Guidance for AWS process and Automation
- Documentation & Knowledge Transfer
- 5 days of total consultation & developer time

\$ 7,499

Bespoke

\$1,800 per day

Support

Annual or multi-year support for your published resources can be provided by Cloudsoft to fix bugs, accommodate API changes and more.

The above packages are illustrative, based on the median and average numbers of resources that technology providers provide on AWS and Terraform registries and can be customised. Advance is available on AWS Marketplace for customers who wish to purchase via their AWS Account.

WHY CLOUDSOFT

Cloudsoft are a provider of choice for AWS , we've developed and tested EKS add-ons for many of of the world's most used technology software providers, as well as building EKS add ons for our own services.

We've worked alongside the AWS teams in developing the end-to-end processes and automation for EKS add-ons. We've been an AWS Consulting Partner for a decade, helping a wide range of AWS customers to use AWS in their well-architected, secure and cost efficient solutions, and have an exceptional reputation and world-class CSAT score.

If you would like more information, please contact our team at fusion@cloudsoft.io or find [EKS Add-on Advance on Marketplace](#)
